MANOJ GARG

Chairman

Technology leader for industrial de-dusting

Reliable dust removal was a task for specialists even at the beginning of the last century. Bag filters of Intensiv-Filter contribute to an improved environment for almost 90 years now. Also today the industrial dust removal has a mean significance. Modern technologies for efficient dust removal are a trend subject due to environmental impacts, climate change, rising energy consumption and conservation of natural ressources of renewable raw materials.

As technology leader in industrial de-dusting we offer complete and tailor-made solutions in the area of dust removal technology and product recovery.
