

## Infastaub celebrates its 40th anniversary

German industrial filtration engineering company Infastaub, of Bad Homburg, recently celebrated its 40th anniversary. Founded in 1967, it has supplied dedusting installations to over 2000 clients in a wide range of industrial sectors.

In November 2007, the Bad Homburg-based company Infastaub celebrated 40 years in existence. The company, which was founded in 1967, has since worked its way to the top as a supplier of dedusting installations with a volume

flow of 200-20,000m<sup>3</sup>/hour.

With a production area of more than 5500m<sup>2</sup>, Infastaub is one of the largest of the smaller-sized dedusting firms. With over 65 employees, the company is at home in almost all industry sectors, be it cement, lime, gypsum, glass, metal, chemicals,

pharmaceuticals, plastics, foodstuffs, wood, or power stations. Infastaub says that its involvement in such a wide range of industries is only possible thanks to its comprehensive product range and its ability to respond rapidly and reliably to clients' wishes.

And so it comes that dedusting units from Infastaub not only find themselves in heavy industry but also at the bakery or DIY outlets around the corner. Thanks to a sustained yield, Infastaub can now look back at 40 years of business with over 2000 satisfied customers who, the company says, recall with pleasure their partnerships

with Infastaub for several reasons – including a rapid pay-back period.

The company plans for this to remain the case in the future under the guidance of the new managing director, Berthold Geppert. On 1st January 2008, Mr Geppert replaced Joachim Thiele, long-time Infastaub managing director, who understood what it takes to develop a company over 40 years from nothing into a prestigious dedusting company renowned for the quality and innovation of its filter installations worldwide.
